## DMX512 DECODER

LT-905

**5**  
CHANNELS

8 bit / 16 bit  
2 kinds of DMX interfaces  
OTP/OCP/SCP protection

  
Photoelectric  
Isolation

www.ltech-led.com

## Product Introduction

1. Designed with 5 channels output, and Max. 5A current per channel, up to 600W output power.
2. Easy operation with digital display and touch buttons.
3. Support 2 kinds of DMX ports: 3-pin XLR, RJ45.
4. With RDM remote management protocol, the operations can be completed via the RDM master console, such as parameters browsing & setting, DMX address setting, equipment recognition, etc.
5. With firmware upgrade function.
6. With short circuit / over-heat / over current protection, as well as warning function when fault.
7. With power-on state management and fast self-testing function.
8. High/low PWM frequency for optional.
9. 16bit (65536 levels) / 8bit (256 levels) grey level optional.

## Technical Specs

Model:	LT-905
Input Signal:	DMX512/RDM
DMX Interface:	3-pin XLR, RJ45
Input Voltage:	12-24Vdc
Current Load:	5A × 5CH Max. 25A
Output Power:	(0-60W...120W) × 5CH Max. 600W
Grey Level:	8bit (256 levels) / 16bit (65536 levels)
Photoelectric Isolation:	Yes
Protection:	Short circuit / Over-heat / Over current protection, recover automatically.
Working Temp.:	-30°C-65°C
Dimensions:	L122×W110×H37mm
Package Size:	L127×W123×H41mm
Weight (G.W.):	550g

Unit: mm

2

## Main Component Description

### Digital display

- Digital display will enter the locked mode without operating after 15S.
- Long press "M" key to unlock.
- Short press "M" key to switch numbers.
- Press "▲" "▼" key to adjust value.

### Dip switch

1 Bit	2 PWM Hz	3 DIM	4 Screen
↓	↓	↓	↓
16	High	Smooth	30S off
↓	↓	↓	↓
8	Low	Std	Enable

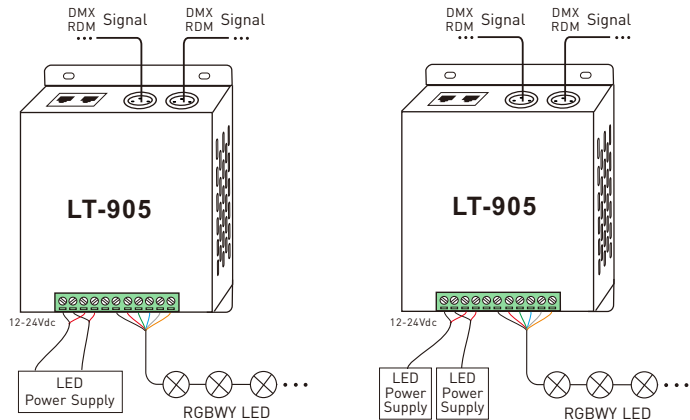

12-24Vdc Power input  
Green terminals LED lamps connection

# Wiring Diagram

## 1 Connecting LED lights:

## 2. DMX console connection:

LT-905 is equipped with 2 types DMX terminals for users' selection. The following diagram takes 3-pin XLR as an example, same connecting method for RJ45.

- \* An amplifier is needed if more than 32 decoders are connected or use overlong signal line, signal amplification should not be more than 5 times continuously.
- \* If the recoil effect occurs because of longer signal line or bad line quality, please try to connect 0.25W 90-120Ω terminal resistor at the end of each line.

### 3. The connection diagram of 2 kinds of DMX/RDM terminals:

3-pin XLR Connected in Parallel

Installation distance > 20mm

RJ45 Connected in Parallel

These 2 terminals can be connected in a mixed way.

\* **Installation Attention** : please reserve enough ventilation distance between decoders (>20mm), be sure not to block the vent, or will affect lifetime of decoder for poor heat dissipation.

## Work with RDM editor

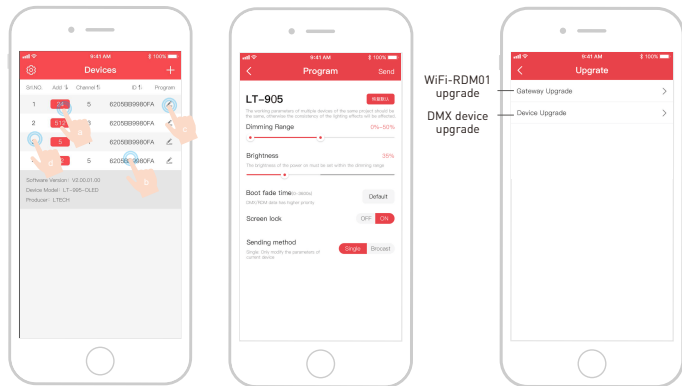

LT-905 can work with LTECH RDM editor (Model: WiFi-RDM01) to realize changing the parameters by long-range setting, wiring diagram as below:

## RDM editor App interface instruction

Download the App, setting LT-905 parameters (dimming range, brightness, boot fade time etc.) after well connecting the RDM editor, more details, please check the manual of WiFi-RDM01.

Well installation of products first, then working with WiFi -RDM01 to realize setting parameters and firmware upgrade by App.

- a: click "Add", edited the address in corresponding box.  
 b: Click "ID", get more product details.  
 c: Click " ", enter edited interface  
 d: Click "No.", issue the recognizing command.

Supporting WiFi-RDM01 upgrade  
and DMX driver upgrade.

\* No further notice if any changes in the manual.  
 Product function depends on the goods.  
 Please feel free to contact your supplier if any question.
