Designer Maria Berntsen imagined a jewelry for the house. Grip is a result of this imagination, where the frame elegantly encircles the light source as a grip, which creates a complete and decorative entity that fits both classical and minimalistic architecture. The light shines both up and down in a beautiful graphic effect, making Grip suitable both inside and outside. The latest LED and IoT technology are integrated in the lamp, and simultaneously Grip is part of the Nordlux Smart Light range, making it possible to control the light from the mobile phone, with voice control or via Nordlux Smart Sensor. An indicator light automatically
