FUNCTIONS

ON/OFF

1. Touch once to turn the lamp ON/OFF.

2. Long touch (3 seconds), the light will flash once, and a 2-hour timer will be set. During this time, if you long-touch the button again, the light will flash and the timer will restart. The light will turn off after time elapses.

LIGHT SENSOR SWITCH

Touch once to enable auto-adjustment of the light according to the surrounding light intensity, an indicator light will turn green.

1. Touch once to enable/disable the function.

2. When the function is enabled, the brightness will be adjusted automatically according to the ambient environment, to achieve a constant overall light intensity.

3. There are two ways to disable the auto-adjustment:

- Touch the function button once.
- Use the dimmer switch to manually change light intensity.

CCT CHANGE

Short touch to select between 4 colour temperatures: 3000K, 4000K, 5000K and 6500K, long touch (3 seconds) to enter stepless mode.

DIMMING

Long touch (3 seconds) to change the brightness level continuously, short touch to change between set brightness levels (10%,25%,50%,70%,100%).

MEMORY FUNCTION

1. The lamp retains its last setting when powered on.

2. The lamp will automatically turn to its last state after power cut.

HOW TO USE

No Glare, Good for Eyes!

1. Traditional screen lighting reflects onto the eyes, potentially causing eye strain or damage.
2. The screen bar features asymmetrical lighting which only shines to the score, with no glare to the eyes.
